

CENTER of EXCELLENCE  
for ENGINEERING BIOLOGY

## Jeffrey Way

Jeffrey Way's current research interests are in therapeutic protein development and bioenergy. As a senior staff scientist at the Wyss Institute, he is also supporting faculty-driven efforts in DNA synthesis and DNA assembly. Before coming to the Wyss, he was Director of Structural Biology and Director of Intellectual Property at EMD Serono, a major protein-focused pharmaceutical company, where he designed protein drugs. Previously, he was a Director of Intellectual Property and Director of Communications there. He has published numerous articles on drug development, synthetic biology, nervous system development, and bacterial genetics, and holds several patent applications and issued patents. He received his Ph.D. and B.A from Harvard University.
