Pilot Project Proposal  
(Not to exceed two pages)

**Name of Project:** Concepts and Ethics in GP-write: Understand, Question, Advance

**Proposer and Contact Information:**

Jeantine E. Lunshof, Ph.D.  
Harvard Medical School  
University Medical Center Groningen, NL

**Background:**

Science needs to incorporate philosophy and ethics because there are concepts to be understood – and questions to be asked – for example, about the concept of human identity. We need to deepen our understanding of these concepts and questions in order to conduct ethical analyses. The aim of this pilot project is to ultimately advance both the science and the humanities.

**Technical Idea:**

N/A

**Utility and “Fit” For GP-write:**

The goals of this pilot are to:

- Build a model to deepen analysis while keeping pace with the dynamics of the science
- Expand collaborations in the humanities and the sciences
- Provide education and training
